## SUMMARY

Product analyst and team lead who owns Xylem Learning's (Physics Wallah) admissions and payments platform: find the problem in the data, write the spec, build it, launch it. Shipped online payments that collected Rs 4 Cr+ in their first two months, plus refund and approval workflows, on a platform used by 500+ staff. Solo-built Rivlo, a ranked exam-prep app. NIT Calicut.

## PROFESSIONAL EXPERIENCE

### Product Analyst, Team Lead

01/2026 – Present | Calicut, Kerala

Xylem Learning (a Physics Wallah company)

- Owned the Admission Portal from spec to launch: enrollment, payment collection, approvals, hostel management, dashboards and support tickets in one role-based app, launched in Apr 2026.
- Built Xylem's two fee-collection pillars, a parent web app and SMS payment links: Rs 4 Cr+ collected online in the first two months; fee collection has since recorded Rs 100 Cr+ across 100,000+ payments.
- Built the platform's core finance modules end to end: discounts and concessions, hostel allotment and billing, refunds, and fee transfers between course, hostel and transport heads, each with role-based approvals.
- Built the parent web app: OTP login by parent mobile, attendance, exam results and hostel details per child, and Razorpay payment per fee head, with webhook reconciliation that posts each fee automatically.
- Refunds and approvals: built policy-based refunds (amount from days since joining), L1/L2/L3 approvals, a retention step that closes requests when the student stays, and one-time bank-detail links.
- Locked down student data: removed export and print rights on sensitive records and masked personal data in self-serve reports.
- Since 2025, ran 1,100+ bulk data imports and maintained enrollment records in production.
- Resolved requests from centres, accounts, hostel and admissions teams across 750+ email threads since Nov 2024: enrollment and program changes, fee and dues corrections, refunds, approvals and data pulls.
- Lead a team of 5 (2 ops, 2 developers, 1 analyst).

### Product Analyst

11/2024 – 12/2025 | Calicut, Kerala

Xylem Learning

- Wrote 15+ BRDs and ran the external development vendor against a costed task list.
- Defined the Base/Pro plan data flow from app to CRM to ERP, later the basis for plan-based pricing (Infinity) built in 2026.

### SDE AI Trainer

01/2024 – 09/2024 | Remote

Outlier

- Wrote and evaluated code to train and improve large language models.

## EDUCATION

### B.Tech in Mechanical Engineering

12/2020 – 09/2024

National Institute of Technology, Calicut (NIT Calicut)

Procurement Head, Ragam fest: ran vendor sourcing and guest travel on a ₹20 lakh budget (~500 people, 3 days)
